### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Tim Cassidy on 5-20-05.

The application has been amended as follows:

In the claims:

Claims 30 and 42-46 have been canceled as being directed to a non-elected invention, the election having been made with traverse.

2. The following is an examiner's statement of reasons for allowance: The prior art of record failed to provide ample motivation for one skilled in the art at the time the invention was made to incorporate a canted extruding device in combination with two vertically oriented chill rollers and a laminating nip wherein the use of the canted extruder for supplying the continuous filaments imparted improved thermal transfer as well as improved spinning and longer die life. While canting an extruder was known per se as evidenced by PCT '366, there is no reason to believe one skilled in the art would have been led to employ the same in the arrangement of the Canadian Patent and achieved the specified results as indicated (i.e. there is no reasonable success expected for improving die life and improved spinning).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeff H. Aftergut whose telephone number is 571-272-1212. The examiner can normally be reached on Monday-Friday 7:15-345 pm.
